

CT214H – Web Programming

Final project

Students will design and develop a fully functional dynamic website on a topic of their choice using PHP, MySQL, HTML, CSS, and JavaScript. This project applies core web development concepts including database design, server-side programming, and responsive user interface design.

Minimum requirements:

- ❖ Database: Minimum 3 related tables
- ❖ User Interface: Responsive design
- ❖ CRUD Operations: Create, Read, Update, Delete
- ❖ Search and Filter: Find and filter content
- ❖ File Upload: Image/document upload capability
- ❖ Form Validation
- ❖ Pagination

Technical requirements:

- ❖ Frontend: HTML5, CSS, JavaScript
- ❖ Backend: PHP
- ❖ Database: MySQL

Group Work Requirements: Task Division Document Required

- ❖ Specify who is responsible for:
 - HTML/CSS
 - JavaScript
 - PHP
 - Database

Note: OR can be divided by tasks. You will be asked to explain the code you wrote during presentation.

Please note that all students **must be able to clearly explain and justify their contribution** and understanding of the group project; otherwise, a score of 0 will be assigned.

Deliverables:

- ❖ Complete source code
 - Organized folder structure (suggestion):

```
project-name/  
├── css/  
├── js/  
├── images/  
├── uploads/  
└── includes/
```

| └─ db-connect.php

- ❖ Database files
 - schema.sql (table structures)
 - sample-data.sql (sample data)
- ❖ Project report must include:
 - Introduction and Objectives
 - System Architecture
 - Database Design
 - Key Features Explanation
 - Challenges Faced and Solutions
 - Conclusion and Future Improvements
- ❖ Presentation
 - Slides (Problem introduction, system design, challenge solution)
 - Live Demonstration: Show all features working
 - Answer questions

Submission Timeline

- ❖ Two Days Before Presentation
 - Submit project report file on ELearning
- ❖ Presentation Day: Submit:
 - Complete source code (ZIP)
 - Database files
 - Presentation slides
